

VACUUM INSULATION

Insulation refers to how the materials and construction prevent temperature change—basically, the ability of a piece to keep a beverage at its original temperature, whether it's hot coffee or ice water. Insulation is achieved through double-wall construction, which has two purposes – to eliminate condensation from cold beverages on the outer wall and maintain the temperature of the beverage within the inner wall.

There are several types of insulation, and we offer them all. It just depends on your budget and the type of performance you're looking for.

VACUUM INSULATION

No air between inner and outer walls

Best

HOT for 5 hours

COLD for 15 hours

\$\$\$

*May vary depending on item construction, material, ambient conditions, and use.

COPPER VACUUM INSULATION

Insulation refers to how the materials and construction prevent temperature change—basically, the ability of a piece to keep a beverage at its original temperature, whether it's hot coffee or ice water. Insulation is achieved through double-wall construction, which has two purposes – to eliminate condensation from cold beverages on the outer wall and maintain the temperature of the beverage within the inner wall.

There are several types of insulation, and we offer them all. It just depends on your budget and the type of performance you're looking for.

COPPER INSULATION

No air between inner and outer walls + copper plated inner wall

Superior

HOT for 12 hours

COLD for 48 hours

\$\$\$\$

*May vary depending on item construction, material, ambient conditions, and use.

CERAMIC LINED COPPER VACUUM INSULATION

Insulation refers to how the materials and construction prevent temperature change—basically, the ability of a piece to keep a beverage at its original temperature, whether it's hot coffee or ice water. Insulation is achieved through double-wall construction, which has two purposes – to eliminate condensation from cold beverages on the outer wall and maintain the temperature of the beverage within the inner wall.

There are several types of insulation, and we offer them all. It just depends on your budget and the type of performance you're looking for.

CERAMIC LINED COPPER VACUUM INSULATION

No air between inner and outer walls + a copper plated inner wall.

Features a ceramic lining for a more natural and pure taste.

HOT for 12 hours

COLD for 48 hours

\$\$\$\$

*May vary depending on item construction, material, ambient conditions, and use.
