BOOST IT

case study: WELCOME BACK!

Companies across the world are bringing their employees back to work! Every company has made necessary changes in procedures and policies to keep their employees safe as they return. Welcoming employees back with a custom journal is a great way to show appreciation for sticking it out during the COVID crisis.

Adding a full-color insert detailing procedural changes is a great way to keep employees informed. We have created a stock insert with basic tips from the CDC that can be adjusted to suit any brand.
