

Nimble is the world's first tech hardware brand with a 100% sustainable business model. The brand creates premium, ethical tech products that are better for the planet, incorporating sustainable materials, using 100% plastic-free packaging and recycling old tech for free.

A New Path For Personal Tech

As the only personal-tech brand that's both a Certified B Corporation and committed to 1% For The Planet, Nimble considers its impact on workers, customers, suppliers, community and the environment.

Better Materials

Eighty percent of a product's environmental impact is determined in the design stage. It starts with exploring renewable resources and existing waste streams. By using materials such as organic hemp, recycled plastics and aluminum, Nimble achieves high-grade durability and reliable performance.

Plastic-Free Packaging

One of the most effective ways for companies to reduce waste is packaging. All Nimble packaging is 100% plastic-free, made from recycled scrap paper with no harmful inks or dyes. It is fully recyclable and biodegradable.

One-For-One Tech Recovery Project

Imagine a world where all tech makers took full responsibility for their products – even after you're done with them. This idea inspired Nimble to include a biodegradable bag with every product sold. Use it to recycle old tech for free, and help close the loop on electronic waste.
