

BE A CHANGE MAKER

Hilana uses upcycled and recycled cotton to create beautiful products and inspire a sustainable way of living.

Every little thing adds up.

ALWAYS UPCYCLING

Every year, about 100 billion pieces of clothing are produced. About 80 billion are purchased. More than half end up in landfills, taking decades to decompose.

The future of the textile industry is here: no waste, no dyes, no chemicals, no extra water through use of closed-loop upcycling methods. During a three-year span, Hilana upcycled more than five tons of cotton waste and saved more than 15 million gallons of water.

THE GOOD CHOICE

Hilana upcycled cotton closes the manufacturing loop in the cleanest way. The textiles are made from recycled material through a zero waste process.

Hilana is 100% committed to evolving and finding new ways to protect the environment, driven by a commitment to sustainability, responsibility and craftsmanship.

WOMEN SUPPORTING WOMEN

When people work together, incredible things happen!

But it's not just about making outstanding products. Founded in 2015 in Santiago, the capital city of Chile, Hilana focuses on people's well-being and personal development, in addition to preserving their culture and crafts.

Hilana is proud to be a Certified B Corporation, balancing purpose and profit to use business as a force for good.

Hilana Upcycled Cotton Fethiye Throw Blanket

As Low As: \$60.00_[D] US / \$83.40_[D] CDN

Best Quality In A Sustainable Way

- ✓ Soft, durable Hilana blankets are made from 50% recycled cotton. Did you know that the more you wash and use them, the softer they get?

Super Compact And Light

- ✓ Hilana blankets fold down in a way that allows you to carry them in a bag, to the beach or the park ... even in your luggage if you're traveling.

Versatile

- ✓ Comfort for home, beach, camping, picnic or travel. Add style to a couch, chair or bed.

Conscious

- ✓ With one Hilana blanket, you're using a product that represents the equivalent of what an average person recycles in 13 years. Join us – be a change maker!
