WARMTH

**VALENCIA**  
TM19310/  
TM99310

Our temperature ranges are a guideline ONLY to assist in choosing the warmth you want and the product you need. Weather conditions such as sun, wind, humidity and precipitation, as well as personal reactions to these factors all affect individual comfort ranges. Activity will also influence personal comfort levels as temperature guidelines are determined from test results performed at a resting state, under controlled conditions at internationally accredited third party laboratories. Everyone experiences temperature differently and these ratings are intended for reference only.
